**Panorama Social de América Latina 2013 (Economic Commission for Latin America and the Caribbean)** Economic Commission for Latin America and the Caribbean United Nations

Spanish Edition

The 2013 edition of this publication presents official measurements for the analysis of income poverty and seeks fresh approaches to poverty and well-being, placing special emphasis on multidimensional approaches. These approaches are exploratory and therefore not comprehensive. They have nevertheless been tackled in this year's edition of Social Panorama because one thing is certain: the need is emerging in social policy design, in the evaluation of social development and in new demands of society for a more nuanced analysis of social progress and lags to underpin more integrated public policy design in the region.
